

Steps in ParaView installation with launcher Icon:

1. Download ParaView binary package: <https://www.paraview.org/>

2. Extract the files: `$ tar -xzf [-----file name]`

3. setup the path in .bashrc/.zshrc file:

```
export PATH=$PATH: /home/----/ParaView-5.13.0-MPI-Linux-Python3.10-64bit/bin
```

4. Make a file named paraview.desktop in usr/share/applications directory:

```
$ sudo touch paraview.desktop
```

5. You need the location of the paraview.png icon

6. Modify the file with this code:

```
[Desktop Entry]
```

```
Version=1.0
```

```
Name=ParaView 5.13
```

```
Exec=/home/sanjoy/ParaView-5.13.0-RC1-MPI-Linux-Python3.10-x86_64/bin/paraview
```

```
Terminal=false
```

```
Icon=/home/sanjoy/ParaView-5.13.0-RC1-MPI-Linux- Python3.10x86_64/share/icons/hicolor/96x96/  
apps/paraview.png
```

```
Type=Application
```

```
x-Ayanata-Desktop-Shortcuts=NewWindow
```

```
[NewWindow Shortcut Group]
```

```
Name=New Window
```

```
Exec=paraview
```

```
TargetEnvironment=Unity
```
