

## Steps in Linux Terminal Customization with *.zsh*:

1. Install *curl* package: `sudo apt install curl`
2. Install *zsh* package: `sudo apt install zsh`
3. Install *git* package: `sudo apt install zsh`
4. Follow the website: <https://ohmyz.sh/>

```
sh -c "$(curl -fsSL https://raw.githubusercontent.com/ohmyzsh/ohmyzsh/master/tools/install.sh)"
```

5. Make *zsh* default shell in terminal: `sudo chsh -s $(which zsh)`
6. Customizing terminal theme:

- a. website: <https://github.com/romkatv/powerlevel10k>
- b. download & install font: MesloLGS NF Regular.ttf
- c. make the font default in terminal
- d. install p10k:

```
git clone --depth=1 https://github.com/romkatv/powerlevel10k.git ~/powerlevel10k
```

```
echo 'source ~/powerlevel10k/powerlevel10k.zsh-theme' >> ~/.zshrc
```

- e. `ZSH_THEME="powerlevel10k/powerlevel10k"`
- f. `source ~/.zshrc`
- g. restart the terminal / pc
- h. configure according to your preference.
- i. enjoy!!
